

He/H 1.6 base (open: ghost rows)

circles: $1 - p_1/p_0$; squares: reservoir half-cell drop;
crosses: $|\Delta \ln \rho|$ of the layer 1.002-1.008 R_p (e_{12} , e_{23})

filled: state of grid N; faint: 2000-cell state sampled at grid N
(the transit + EW integration alone)
